

COVID-19 UPDATE

Hirani Engineering and Land Surveying has been closely monitoring and adopting all CDC recommendations and government directives for the changing protocols associated with COVID-19. Our top priority is to ensure the safety of our staff, clients and their families. Therefore, many Hirani employees are working from home; and those working in the office have been directed to maintain social distancing. We do not hold face to face meetings but rather use conference calls and video conferencing.

It is our hope that we can do our part to minimize the spread of the virus. We routinely communicate via email, phone and remote desktop protocols and we can assure you that we have been conducting “business as usual” despite the challenges associated with COVID-19 with no loss of productivity or our ability to meet schedules. We have implemented software to allow our employees and their managers to remain in regular contact.

All Hirani employees can be reached via their email, cell phone or by calling Hirani’s main line – 516-248-1010 and listening for our staff member’s extension.

We would like to assure you that our clients remain our top-priority and we will continue to provide all services for our projects.

Hirani wishes everyone good health and for more information on COVID-19 please visit <https://www.cdc.gov/coronavirus/2019-ncov/index.html>
